RESEARCH
EDUCATION
AWARENESS
ADVOCACY

WHO WE ARE

The Bobby Jones Chiari & Syringomyelia Foundation, Inc. is a non-profit organization founded in October 2007 with the goal of raising awareness and finding a cure for Chiari malformation (CM), syringomyelia (SM), Ehlers-Danlos syndrome, and related disorders.

Bobby Jones CSF funds education, advocacy, and research projects and meetings and has impacted more than 3.5 million people in the U.S. and more around the world.

WHAT WE DO

- Educational lectures with world-renowned physicians and clinicians
- Fund targeted research projects and research endowment
- Expand International Patient Registry
- Provide free educational lecture videos and information on our website
- In-person and virtual support meetings
- Develop new and expand existing programs to spread awareness
- Advocate for federal research funding

WHO WE HELP

We advocate for patients and families with the following disorders:

Chiari malformation (*kee-AR-ee*)

Syringomyelia (*seer-in-go-my-EEL-ya*)

Ehlers-Danlos syndrome (EDS)

Dysautonomia

Postural Orthostatic Tachycardia Syndrome (POTS)

Intracranial Hypertension/Hypotension

Tethered Cord Syndrome

Cranio-cervical Instability (CCI)

Hydrocephalus

Scoliosis

CURRENT RESEARCH PROJECTS

We know the weight of uncertainty families face when a loved one battles a complex disorder. We are currently funding at least 15 research projects at a time to bring clarity and hope. We're unlocking scientific mysteries, bridging gaps between doctors, and finding treatments that truly make a difference. Our Chiari Surgical Success Scale (CSSS) is a good example. Having surgery can be a huge decision, but right now, doctors can't always predict who will benefit. By listening to patients and tracking their experiences, we're building a tool to give doctors clear, helpful advice. We want to bring certainty and comfort, so families can feel confident and supported. Your support makes this possible, bringing us closer to a future where patients and families live fuller lives, with less pain!
